

### THE WAY OUT.

(To the Editor).

Sir.—Kindly grant me space for a few remarks which I believe to be in the public interest. I read with interest M. Lyons's policy speech. Incidentally I also read of the rise in the cost of our daily staff of life—bread. Mr. Lyons touches significantly upon many things but he omits to mention the "Douglas Social Credit System." Perhaps he does not know what it means—what it is; perhaps you don't know; perhaps very few people in Mackay know. I quite agree with Mr. Lyons that inflation, no matter how controlled, is still inflation; but under the Douglas System inflation is impossible and deflation also is impossible. Then why not learn and find out what the Douglas System is and means? The Douglas Social Credit means that within a month of its legislative adoption the depression would be entirely lifted off the people of Australia. The debts of Australia would be wiped off progressively and leave the people of Australia debt-free and in the sole unchallenged possession of its enormous wealth and resources.

Whilst seeking the truth I sought information of the D.S.C.A. of Brisbane. Inter alia, below are the concluding remarks of their letter: "With regard to the coming elections, the whole of the Douglas Social Credit of Australia is doing its bit." Are any individuals favorably impressed by its proposals?—The Southampton Chamber of Commerce; the London Chamber

ber of Commerce; the London Chamber of Commerce; the Rotarians; the R.C Church; the Church of England; the Church of Scotland; and many others. In 16 years not one person including bankers and economists, has been able to show one flaw in the Douglas analysis of the present system, and only the other day the Prince of Wales complimented the Chamber of Commerce of England in their fight for a change; and the change they are fighting for is the Douglas way out.—Your's &c.,

**CHARLES PULPE.**

P.O. Mackay, August 14.
